

The grinding wheels specially developed for the Rondamat 1000 are available as CBN or diamond grinding wheels. A distinction is made here as to whether profile knives, straight knives or profile knives with a high number of teeth are ground.

ADVANTAGES

- 10 mm usable abrasive coating
Longer usability
- Torsion-free steel base body
Higher precision
- Infeed 1mm per stroke possible
Faster grinding
- Lowest unbalance - Highest concentricity
Better sanding result
- Dressing service from a professional
Sustainability through longer service life
- Direct submission to WEINIG**

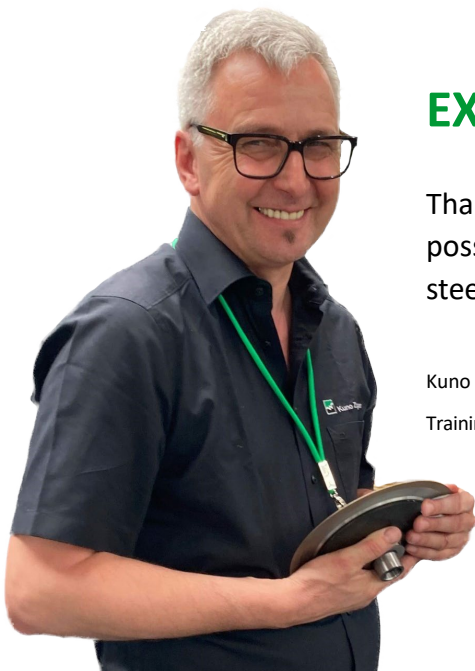

EXPERT OPINION

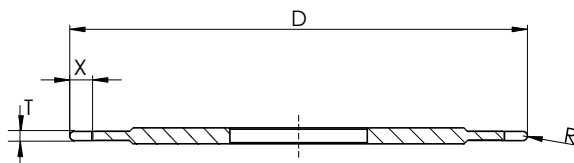

Thanks to our easy-cutting binding systems, infeeds of up to 1 mm are possible. Lateral cutting pressure is no problem thanks to the torsion-free steel base body."
